

Datasheet

Powered filtering device BARIAIR

Designation:

Basic unit BARI-Air

Description:

Fan filter device filters the ambient air via three filters connected to the device. Depending on the filter type, the filters absorb particles, gases, vapors or combinations thereof from the ambient air. After the filtering process, treated ambient air is fed through a hose into the face shield, where it is available as breathing air. The generated overpressure prevents pollutants from the environment from entering the headpiece.

Article-Number:

202045

Application:

BARI-Air is designed for a wide range of applications where a high level of protection and comfort is required. The device can be combined with a visor, a hood or a helmet combination.

Standards:

DIN EN 133
DIN EN 12941

Respiratory protective devices - Classification
Respiratory protective devices - Powered filtering devices with a breathing connection without a tight fit (hood)

Dimensions:

Blower including belt 300mm x 190mm x 170mm

Weight:

approx. 2600 grams

Shelf life:

Remove the filters and the rechargeable battery
Dry components
Store components in a container or cabinet
Protect the device from direct sunlight, heat and moisture

Handling:

Only remove the filter from the packaging immediately before use. Screw the filter holder firmly into the connection piece of the mask.

Focus of use:

Varies depending on whether the hood, visor or Visor Combi is used.

Service life:

≥ 8 hours

Instructions for use:

The use of breathing filters requires a basic knowledge of the function and handling of respiratory protective devices. Information on this can be found in the trade association regulations and rules, in particular in DGUV Rule 112-190.

The use of respiratory protective devices generally means additional strain for the person wearing the respiratory protective device.

Most respiratory protective devices require occupational health screening in accordance with the "Ordinance on Occupational Health Care" (ArbMedVV).

Damaged filters must not be used.

Revision 02.2024 – Errors and omissions excepted. All data are non-binding guide values.

Regulations / rules:

Regulation (EU) 2016/425 on personal protective equipment
PPE Usage Ordinance (PSA-BV)
Ordinance on occupational health care (ArbMedVV)
BGV A1 Employer's Liability Insurance Association Regulation for Safety and Health at Work - Accident Prevention Regulation - Principles of Prevention

DGUV Rule 112-190 Employer's liability insurance association rules for safety and health at work - "Use of respiratory protective devices"

Hazardous Substances Ordinance (GefStoffV) with associated Technical Rules for Hazardous Substances (TRGS), in particular TRGS 402 "Determination and assessment of hazards during activities with hazardous substances: Inhalative exposure" and other technical rules for hazardous substances.

Technical data:

- Made of chemical-resistant and impact-resistant ABS plastic
- Removable lithium-ion battery (Heavy Duty 7.8 Ah) for an operating time of at least 8 hours in any combination
- Charging time of < 4 hours
- Triple warning system: audible, visual, vibration
- Equipped with 3 filter connections
- High capacity filter for high pollutant concentrations (5,000 ppm)
- Option to close one filter connection with 2 x P3 filters
- Two control buttons for start/stop - optional adjustable flow rate in 4 stages 160 -220 l/min
- Full-color LED display with flow rate, battery and filter display in several languages
- Fully electronically controlled air flow - automatic daily calibration
- Ingress protection in IP class IP65
- Service timer for maintenance work
- Filter timer for filter change

Revision 02.2024 – Errors and omissions excepted. All data are non-binding guide values.

Datasheet Hood BariAir 1000 CHEM3

Designation:	Hood BariAir 1000 CHEM3 Personal protective equipment Filtering respiratory protection	
Description:	High-quality BariAir 1000 CHEM3 respiratory protection hood protects the wearer during numerous activities. No occupational health precautions according to ArbMedVV, as weight <3kg and no breathing resistance.	
Article-Number:	202048	
Application:	The BARI-Air series hoods offer lightweight and comfortable protection in many industrial applications. It provides protection for the eyes and face and is ideal for environments where the highest possible level of protection is required.	
Standards:	DIN EN 133 DIN EN 12941	Respiratory protective devices - Classification Respiratory protective devices - Powered filtering devices with a breathing connection without a tight fit (hood)
Materials:	Visor Hood Head spider	Polyethylene terephthalate, modified with glycol Ethylene-vinyl alcohol copolymer Hard polyethylene
Weight:	approx. 400 grams	
Storage temperature:	-10 °C to + 40 °C relative humidity below 89%.	
Operating temperature:	-10 °C to + 40 °C relative humidity below 89%.	
Main application:	Barrier against organic and highly concentrated inorganic chemicals - particularly suitable for the disposal of hazardous substances and industrial cleaning.	
Equipment class:	TH3P/ VdGW 100	
designed for:	Head section individually adjustable via a rotary wheel.	

Revision 02.2024 – Errors and omissions excepted. All data are non-binding guide values.
