

## Datasheet

# CHEMICAL PROTECTION SUIT CASE ONE® A

The Case ONE® A gas-tight disposable suit protects against hazardous and toxic chemicals in liquid or gaseous form in firefighting operations and in the chemical industry.

The chemical protective suit is maintenance-free and is used with a respirator with mask worn under the suit.

Tight fitting gloves and boot socks with drip edge or S3 sole provide the best protection.

The back entry with gas-tight zipper and the large panoramic visor made of Melinex® contribute to safe and comfortable work.

- » Material: DuPont™ Tychem® 6000 F
